

# DR. PRICE'S CREAM Baking Powder

Purity in food, lower cost of living—these are the demands of the day.

Pure food is health, and health is economy itself. We cannot have health without healthful food.

The most healthful foods are the quickly raised flour foods—biscuit, cake, muffins, crusts and other pastry, when perfectly made from wholesome ingredients.

Dr. PRICE'S baking powder makes these foods in specially attractive, appetizing and wholesome form, and for both economic and hygienic reasons, such food should be more largely substituted for meat in the daily diet.

**But bear in mind that alum, or unwholesome baking powder, can never make pure, wholesome food.**

### CHECKS WERE RETURNED.

J. W. Woodall is Placed Under Arrest For Drawing Checks Without Funds.

During the holiday week J. W. Woodall, a young cowboy, who recently came to this section from Texas, was a visitor in Clifton in company with other cowboys from the surrounding range. From time to time Woodall found himself out of ready money, when he would present a check on the Hilo National Bank, of Hilo, Texas. The checks were for small amounts ranging from five to fifteen dollars. The signature to the check was F. W. Hudson by J. W. Woodall.

In the course of events some of these checks reached Hilo, Texas, and were paid by the bank. Others were refused payment. Finally the total of unpaid checks amounted to approximately fifty dollars and a warrant was sworn out for the arrest of Woodall. He was located on Pigeon Creek by Deputy Sheriff Keppler and brought to Clifton where he was arraigned before Justice Leonard. Woodall told a straight forward story about the transaction. He said there should have been money deposited in the bank on a note which he believed had been deposited in sufficient amount to cover all the checks he had drawn. He was paroled by Justice Leonard with a small fine and will be given opportunity to make good his overdraft at the Hilo bank.

### FRESHMEN VS. SENIORS AND JUNIORS.

A double header Basket Ball game was played at the Armory Wednesday night, the opposing teams being the two Clifton High Girls Teams, Freshmen vs. Seniors and Juniors, and two local boys teams, Giants vs. Stars. The girls put on the curtain raiser, which was also the main event as far as the male portion of the audience was concerned. They played a remarkably good game considering that it was their first public appearance. First honors going to the Seniors and Juniors. Score 19 to 14.

The second game, between the Stars and Giants was very fast and some very good individual playing shown, with practice they will be able to put a pair of mighty good teams in the field. This game went to the Giants to the tune of 24 to 12.

### ARIZONA STATE SEALER.

Making a Tour of Inspection of Cities and Towns.

Phoenix, Ariz., Jan. 12.—O. N. Creswell, state inspector of weights and measures, has started on a tour of Arizona, that is to cover all towns between 1,000 and 5,000 population. He will go first to Tempe and Mesa, then to Clifton, Morenci, and other places in the east part of the state. Inspecting the weights and measures used in stores of all kinds.

All cities over 5,000 in Arizona have sealers, who look after the weights and measures. The legislature did not see fit to give the state inspector jurisdiction in places under 1,000 because of the expense. The butchers and bakers are going to make an effort to have the law repealed at the next regular session of the legislature. It requires that a stamp giving the exact weight be pasted on each loaf of bread and that each purchaser of meat be given a weight slip.

Silver had a prosperous year in 1912. The London average price of 28 1-16 pence was higher than in any year since 1907, when the average for that year was 30 3-16 pence. In New York silver got up to 64 1-8 cents during the year and is now about 63 3-4 cents. In 1911 the average New York price was 41.71 cents.

The feature of the past year in the silver market was the renewed purchases by India, the total being estimated at \$5,000,000. Most of these purchases were made without public knowledge so that the speculative holdings of silver in India could not be dumped on the market.

The political situation in China also was a factor as it caused the people there to hoard silver, making it more expensive and difficult for the government to buy gold for interest payments.

### COPPER.

Prices Steady Despite Large Increase in Domestic Stocks.

Copper prices have been steady despite the large increase in the domestic supply of visible stocks in the month of December as shown by the copper producers association's monthly statistical bulletin.

Sales of Lake copper are being made at 17.65 cents for some grades, while other Lake companies have sold large amounts at 18 cents, the latter of course coming under the usual guarantee contract as to price, which may mean a fractional reduction within three months.

The present position of the metal with domestic stocks of practically 105,000,000 pounds must be considered very satisfactory. This is equal to only three weeks' consumptive demand at the current rate of monthly deliveries.

The position is far more healthy than during the period from May to August last year when the domestic stocks got down to under 50,000,000. Then there was not enough copper on hand to guard against unexpected emergencies. Such a low proportion of visible supply in almost any other commodity would have resulted in a substantial advance in prices, and that of corners, manipulation, etc.

Abroad the consumption of the metal continues at a gratifying rate. Figures showing the German consumption for 11 months of 1912 to Nov. 30 place the total at 182,943 tons against 168,096 tons for the corresponding time in 1911. As soon as the peace outlook in Europe is brighter undoubtedly there will be a big buying movement from that quarter.

Recent transactions in copper are believed to have aggregated between 50,000,000 pounds and 60,000,000 pounds.

From the statistics now available it is apparent that the advance in the price of the metal since a year ago has not resulted in increasing the output of any of the older mines, the gain in production having been due to the newer porphyry properties. It also is evident that the higher prices have not interfered with consumption which in 1912 was on a larger scale than ever before.
